# ClarionDoor

Configure Coverage and Bring it to Market Faster

Insurers are relying on innovation more than ever. With new risks and emerging competition around every corner, insurers must refine their coverage portfolios to meet the moment.

Efficiency matters. But traditional rating and distribution technology provides little of it. Bulky, complicated, and inflexible solutions cause massive delays in getting new coverages live.

ClarionDoor meets this issue head on. This digital distribution solution offers insurers a modern Rate, Quote, Bind, and Issue experience. One that can bring coverages to market in weeks, not months – helping insurance providers thrive.

Named a Rating Luminary by Celent.

RATING AND DISTRIBUTION FOR THE MODERN INSURANCE MARKET

Configurability

The ClarionDoor solution conforms to insurer processes, not the other way around. Upload, map, or natively create rating algorithms, forms, coverage limits and more. No advanced IT knowledge required.

Efficiency

Say goodbye to fears of version control delaying deployment. With ClarionDoor's cloud-based solutions, quickly save updates to coverages and connect them to external policy admin systems.

Speed to Market

API architecture allows for near instant deployments, with distributors receiving up-to-date coverage within seconds. That's one less snag to account for when launching new or refreshed coverages.
