# TurboRater API for Credit Unions

Embedding Personal Lines Quoting Data Within Lending Processes

ZYWAVE API

Every day, people turn to Credit Unions for loan assistance when looking to purchase a home or vehicle. They often turn elsewhere to buy insurance for those new assets. It's an inefficient process that costs consumers time and your Credit Union lost business opportunities.

TurboRater API connects the dots by bringing real-time data from Zywave's personal lines comparative quoting solution into the loan application process. It enables you to bundle insurance and loans, maximizing your revenue and increasing satisfaction for your members.

Credit Unions Have Increased Insurance Cross-Sale Rates by An Average of 22% Through TurboRater API

Reliable Rating Data

Say goodbye to data integrity fears! TurboRater's directly sourced rates are kept up to date. Our API delivery reduces manual data error opportunities while significantly enhancing your team's bandwidth.

Wide Scope of Available Insurance Carriers

TurboRater API supports rating nationwide. With personal lines quotes available in all 50 states, you won't sacrifice breadth of options while embedding insurance into your workflows.

New Horizon for Business Processes

No more jumping through hoops while embedding quoting data within your workflows. TurboRater API meets industry standards for structure and validation, allowing quotes to populate instantly.
