Increase Revenue

Increase your agency's revenue and improve client satisfaction by delivering impactful cyber policies and premiums to your clients. Decreasing the time it takes to quote cyber insurance will allow your team to focus on scaling up your business revenue by writing more business.

Right Coverage for the Right Price

Provide your clients with the transparency they need by comparing coverages, insurers, and premiums side by side to identify the price and coverage combination that best fits their needs.

Save Time & Improve Efficiency

Leave duplicate and frustrating work in the past. Stop spending time entering quote information into multiple insurer websites and decrease the opportunity for data entry errors. Use one system to quote multiple insurers, eliminating dual data entry to bind the policy in Cyber Quoting or bridge quickly with bindable quotes in the insurer portals.

Deliver Benchmarked Bindable Quotes with Embedded Cyber Insights

Eliminate guessing. Help your clients reduce exposure with embedded industry data with limit adequacy. Delve into potential coverage models, identifiable loss gaps, and common coverage levels in app.
